NOTICE: This sequence may not represent the entire insert of this clone. It may be shorter because we only sequence overlapping clone sections once, or longer because we provide a small overlap between neighboring data submissions.

This sequence was finished as follows unless otherwise noted: all regions were double stranded, sequenced with an alternate chemistry, or covered by high quality data (i.e., phred quality >= 30); an attempt was made to resolve all sequencing problems, such as compressions and repeats; all regions were covered by sequence from more than one subclone; and the assembly was confirmed by restriction digest.

APPING INFORMATION

The sequence of this clone was established as part of a mapping and sequencing collaboration between the NHGRI Chromosome 7 Mapping Project (Eric D. Green, Director), John D. McPherson in the Department of Genetics (Washington University), and the Washington University Genome Sequencing Center. For additional information about the map position of this sequence, see http://www.nhgri.nih.gov/DIR/GIB/CIR7, send

SOURCE INFORMATION:

The RPCI-II human BAC library was made from the blood of one male donor, as described by Osoegawa, K., Woon, P.Y., Zhao, H., Frengen, E., Tateno, M., Catanese, J.J. and de Jong, P.J. (1998) An improved approach for construction of bacterial artificial chromosome libraries. Genomics 51:1-8. The clone may be obtained either from Research Genetics, Inc. (http://www.resgen.com) or Pieter de Jong and coworkers at the Roswell Park Cancer Institute (http://acapac.med.buffalo.edu)

NEIGHBORING SEQUENCE INFORMATION:

The clone sequenced to the left is RP11-476H24, 6 bp overlap; the clone sequenced to the right is RP11-279022, 2000 bp overlap. Actual start of this clone is at base position 1 of RP11-5C23; actual end is at base position 23039 of RP11-279022.

Data from AC074285 and AC073077 was used to finish this clone, AC093726. Polymorphisms have been identified between AC07428 and AC093726.

The clone RPI1-5C23 contains a 112 bp insertion not sequenced in the right neighboring clone, RPI1-279022. This insertion sequence is being submitted as H_NH0005C23_F1.
